

Useful Can Be Beautiful

Elevate your outdoor living with safety, style, and comfort

Mission Statement

We transform ordinary experiences into extraordinary ones. By creating comfortable spaces that look great and feel safe, we're improving people's lives one surface at a time.

Why Choose Softroc®

We are your industry leading safety surface solution

Softroc elevates any space by providing comfort, safety, and style. And because it is heat resistant, you can enjoy it all year round, even in the hottest temperatures. Composed of high-quality rubber and binders in extensive color options, you can create a distinct space that looks great and feels safe!

Who knew surfaces could be so comfortable, stylish, and safe?

The Softroc® Difference

We transform your outside spaces into comfortable places, with custom surfacing that checks every box on your list

- ✓ Stays cool to the touch even in the summer heat
- ✓ Maintains integrity even in high traffic areas
- ✓ Flexible in all environments and temperature variations
- ✓ Prevents water accumulation and microbial growth
- ✓ Easy to maintain with minimal upkeep
- ✓ Impact friendly and slip resistant

Creating peace of mind with surfaces that can be enjoyed year round

No one wants a surface that can only be used
some of the time. Unlike traditional options,
Softroc is a four-season surface that is
comfortable on even the hottest summer days.
Softroc is a soft, textured, and porous surface
that is shock and impact absorbent.

Renewing your space to reflect your lifestyle

It's time to upgrade a dull and worn space with a stylish, colorful look that will make a lasting impact. Softroc's rubber granules are not only completely colored but they are also fade resistant so your surface will be beautiful for years to come. With multiple color options, pattern and logo possibilities, and several finish edge choices, Softroc offers unlimited custom design potential.

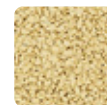

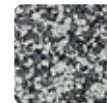

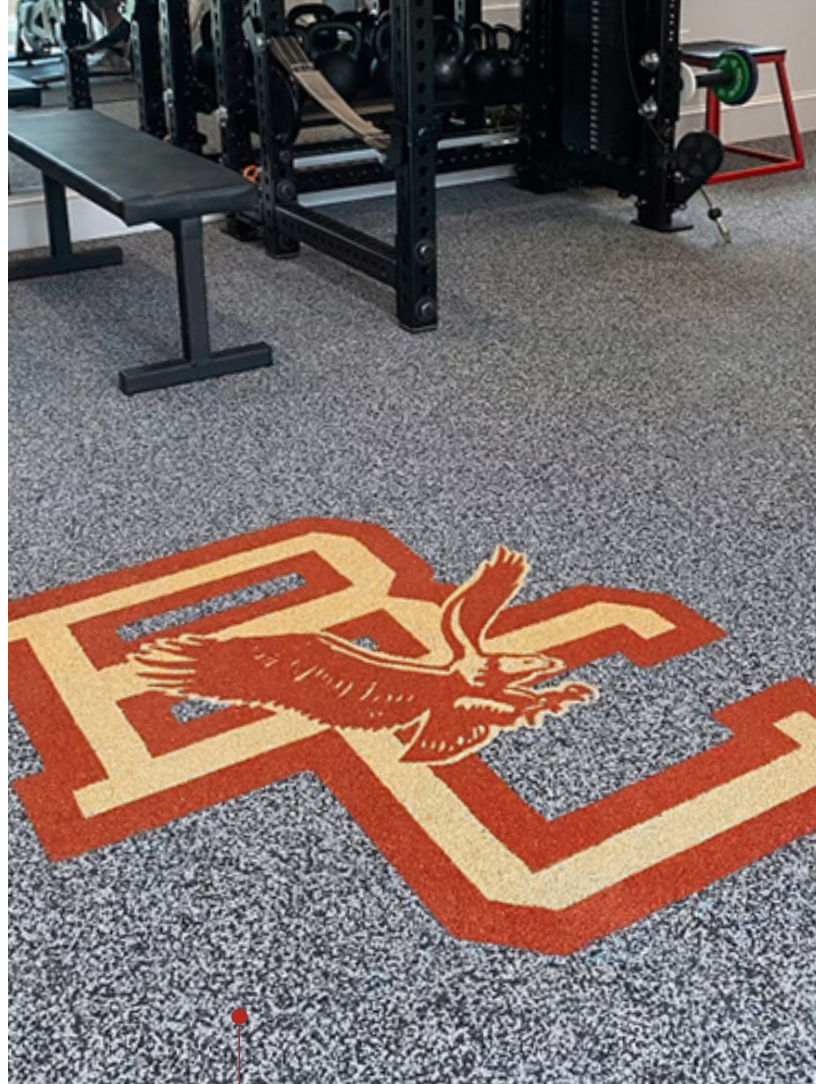

Useful Can Be Creative

Great results everyone will envy and everyone will enjoy

Ordinary becomes extraordinary

When you transform and soften your space with a Softroc seamless surface, you can enjoy safety, style, and comfort all year long.

BEFORE

AFTER

“

Couldn't be happier – has my highest recommendation. The company converted my eyesore pool deck into a beautiful area that is comfortable to walk on and looks great. The Softroc surface was perfect for blending the mismatched concrete into an attractive and uniform deck.

3

GET YOUR RUBBER SURFACING INSTALLED

Enjoy your nearly maintenance free, upgraded surface with all your friends and family

- Soap and water clean up
- Resealing available to add strength
- Eliminate floor repairs, cracks, spots, and peeling

The Softroc® Experience

“

The crew did an amazing job laying down my Softroc. Not only do I have a non-slip surface around my pool, but my concrete is protected and my feet stay a lot cooler in the summer! Their crew was timely, professional, and hard working. I'm happy to be a part of the Softroc family!! Can't wait to add more!

Softroc® Specifications

EPDM Rubber Granules

Ethylene Propylene Diene Monomer (EPDM) is the highest used resilient product on the market. Softroc EPDM has the perfect combination of flexibility and durability to give customers the best resilience possible.

HIGH QUALITY

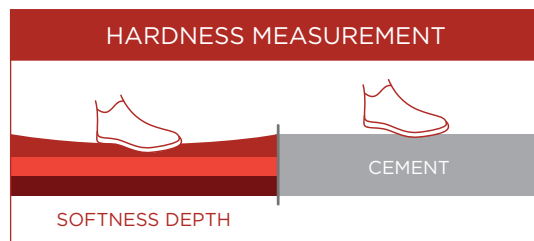

- Produced from virgin raw materials
- ASTM and CSA tested and certified

HIGH ELASTICITY

- Prevents cracking of the surface even if concrete cracks underneath
- Creates slip-resistant surfaces
- Offers fall protection

EPDM RUBBER GRANULES

- Pure vulcanized rubber chips
- 1-4mm diameter
- UV stable
- Non-toxic
- Latex-free

The Softroc application depth is determined by a few variables including drop height, hardness requirement, and underlayment.

SBR Rubber Granules

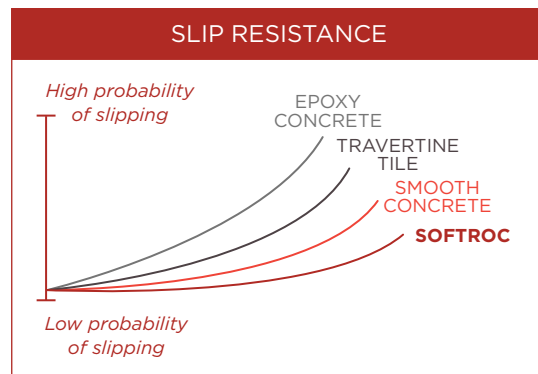

Styrene-Butadiene Rubber (SBR) is an extremely durable surfactin material used for variety of applications, especially for heavy traffic areas including driveways, garages, walking trails, and recreation facilities.

MAXIMUM STABILITY

- Makes even surfaces
- Provides grip and balance

SBR RUBBER GRANULES

- 1-4mm diameter
- Chemically cleaned, eco-friendly product made from recycled tires
- Only available in black

The coefficient of friction is significantly higher on this rubberized surface which helps prevent slipping even when wet. Dynamic Coefficient of Friction (DCOF) measures the slip resistance.
